Profile

With over 15 years of experience in the software development industry, I've held roles like Engineering Manager, Team Lead, Technical Co-Founder, and Full-Stack Senior Engineer. I excel in Typescript and JavaScript technologies and have ample experience in front-end solutions like React, Next and React Native; in back-end solutions like Node, MongoDB, MySQL, and APIs using REST and GraphQL; and in cloud platforms like AWS (Lambda, DynamoDB, Amplify).

I care greatly for design, accessibility and responsiveness, have extensive independent freelancing and contracting experience with multiple projects delivered successfully, and hold certifications as a Professional Scrum Master and Scrum Developer.

Skills

JavaScript	Typescript	React	Next
Node	React Native	Vite	Webpack
AWS	Cloud	REST	GraphQL
